

Outdated Dependencies Report

Generated: 2025-12-04T09:29:00.052Z\n\n## Summary

- Total outdated packages: 147
- Major updates: 90
- Minor updates: 50
- Patch updates: 7

Recommendations

1. Audit critical runtime dependencies (React, Redux, Axios, Webpack) for migration steps before upgrading.
2. Update build tooling incrementally (Babel, ESLint, Webpack loaders) to avoid breaking the pipeline.
3. Refresh UI libraries (Material UI, Bootstrap) only after verifying component-level changes.
4. Align Node/npm versions and remove unused packages as part of the upgrade.
